Records- Historical data

The screenshot shows a web browser window with the following elements:

- Browser Tabs:** "Inbox (3) - harleywatkins" and "Select Report Type Screen".
- Address Bar:** A redacted URL.
- Navigation Bar:** "FATPOT Web Access | Select Report Type Screen | Help | Log Out (Harley Watkins)".
- Main Content Area:**
 - Activity:** Activities, Log Entries, Shifts. Each has a "Templates" button.
 - Case:** Current Cases, Current Investigator Assignments. Each has a "Templates" button.
 - Reports:** A list of report types: Accident People and vehicles, Accident Reports, Arrests, Citation Violations, Crime Offenses, Date Comparison Summary, Incident Flags, Property Reports. Each has a "Templates" button. A tooltip for "Accident People and vehicles" reads: "The accident people and vehicles stat shows the number of people, fatalities and other injuries."
 - Other:** Account Status Detail, Current Versions for Users, Facilities List. Each has a "Templates" button.
 - Previous Stats:** A button with a left arrow icon.

Web based data mining

- **FATPOT-Average to work with -Build and customize products to meet UHP**
- **Willing to provide modifications to the product to meet our needs and wants**

POSITIVES

- **Information sharing within FATPOT users is decent**
- **Can't see other vendors summaries**
- **Programming time can be lengthy for changes to the database**
- **No dispatch module, but read only access provides some information from Spillman and EForce Cads to FATPOT users**
- **No Jail module**
- **Database is a mess, difficult to retrieve stats**

Drawbacks

- Autofill from inquiry. Run a license number or plate number and autofill into a citation, crash, or crime report
- Based in Bountiful
- Flexible

Strengths

- **FATPOT wanted to improve the law enforcement records management process for the front line officers**
- **Allowed the department a significant amount of latitude in developing their software packages**
- **Many of the states in the U.S., as well as countries outside of the U.S. are using service**
- **Front end is great. Back end and service is lacking**

FINAL SAY
